

Glass Fibre Vessel Access System

Sponsor: Various

Project: Supply a Glass Fibre self-assembly unit, for use inside storage vessels where the access is through a 500mm access point.

Unlike the traditional labour intensive steel access systems, our GRP Folding tower provides a much more user friendly, and speedier means of access.

Each frame folds in half until in the vessel, where it is then simply opened and used as a traditional mobile tower.

Specifications: Folding Frames
Triple Hand Rails
Triple Guard Rails
Fire Retardant Timber or GRP Decking
Steel Base Plates

0.75 mtrs wide
1.8mtrs to 2.4mtrs long
6ft to 30ft platform heights
